

HUBER MOUNT | TYPE 159 MODEL P

Two-Axis Mount

NUMBER	DESCRIPTION	LENGTH (IN.)	WIDTH (IN.)	HEIGHT (IN.)	WEIGHT
159-P	Fully Assembled Mount	3-1/2	3-1/2	15/16	9 oz.
Components		High-strength aluminum alloy with black anodized finish			
Screw Parts		Stainless Steel			
Azimuth Range					
Elevation Range					

This mount is ideal when direct attachment to an instrument base might provide a lower center of gravity and quick-disconnect is not required.

This adjustable sight mount was originally designed for Norair Division, Northrop Corporation as a sight harmonizer for the "Norsight" on T-38 and T-54 installations, as well as a standard mount for that sight when used in other aircraft.

To meet the special requirements of access and ease of adjusting and locking, extended azimuth and elevation controls have been provided and these in turn supplied with hex heads. Instead of the characteristic indirect locking feature on this size mount, a standard hex head AN bolt is inserted into the central stud into a Heli-Coil locking insert.
